SPLIETHOFF
GROUP

SPLIETHOFF GROUP

The Spliethoff Group is one of the largest shipping companies in the Netherlands, providing quality services that meet the highest industry standards.

Headquartered in Amsterdam, we have a century of maritime expertise behind us, and offer a broad portfolio of specialised services in sectors, including

- Dry cargo, breakbulk & project cargo (Spliethoff & ForestWave)
- Heavy lifts & project cargo (BigLift Shipping)
- Container & Ro-Ro cargo and door-to-door services (Transfennica & Transfennica Logistics)
- Shortsea (Wijnne Barends)
- Yacht transport (Sevenstar Yacht Transport and DYT Yacht Transport) and
- Tonnage provider (Bore).

We are a dedicated team of professionals, committed to making sure that all cargoes are handled safely and efficiently. Drawing on our in-house engineering and logistics capacities, the companies within the Group work closely together for the best integrated and cost-effective solutions for our clients. As a Group, we operate a large and modern fleet of more than 145 vessels which range in size from 2,100 to 23,000 tonnes. Versatility and flexibility are at the heart of our customer service. This is reflected in the fleet, which includes the widest array of vessels, comprising:

- Multipurpose vessels
- Heavy lift vessels
- Module carriers
- Shortsea vessels
- Ro-Ro vessels
- Semi-submersible vessels.

We are used to operating in challenging areas and almost all vessels have Swedish/Finnish Ice Class 1A, some even 1A Super.

WORLDWIDE OCEAN TRANSPORT

CARGO PROFESSIONALS

A great variety of cargoes - from bulk to heavy and over-sized cargoes - often for long-standing clients in many different industries - are carried worldwide by our versatile fleet.

Each cargo is unique and has individual requirements. Our teams of highly skilled professionals have decades of experience and the mindset to think creatively, enabling the Spliethoff Group to offer innovative and safe solutions for even the most technically and logistically challenging projects. Meticulous planning, coordination and supervision ensure safe and efficient transportation and, when required, in-house engineering takes care of all the necessary preparations.

The Spliethoff Group staff is used to challenges and we know the value of reliability. Tailor-made, carefully thought out solutions give customers peace of mind, after all.

SPECIALISTS IN CARGO HANDLING

WORLDWIDE OCEAN TRANSPORT

SPLIETHOFF

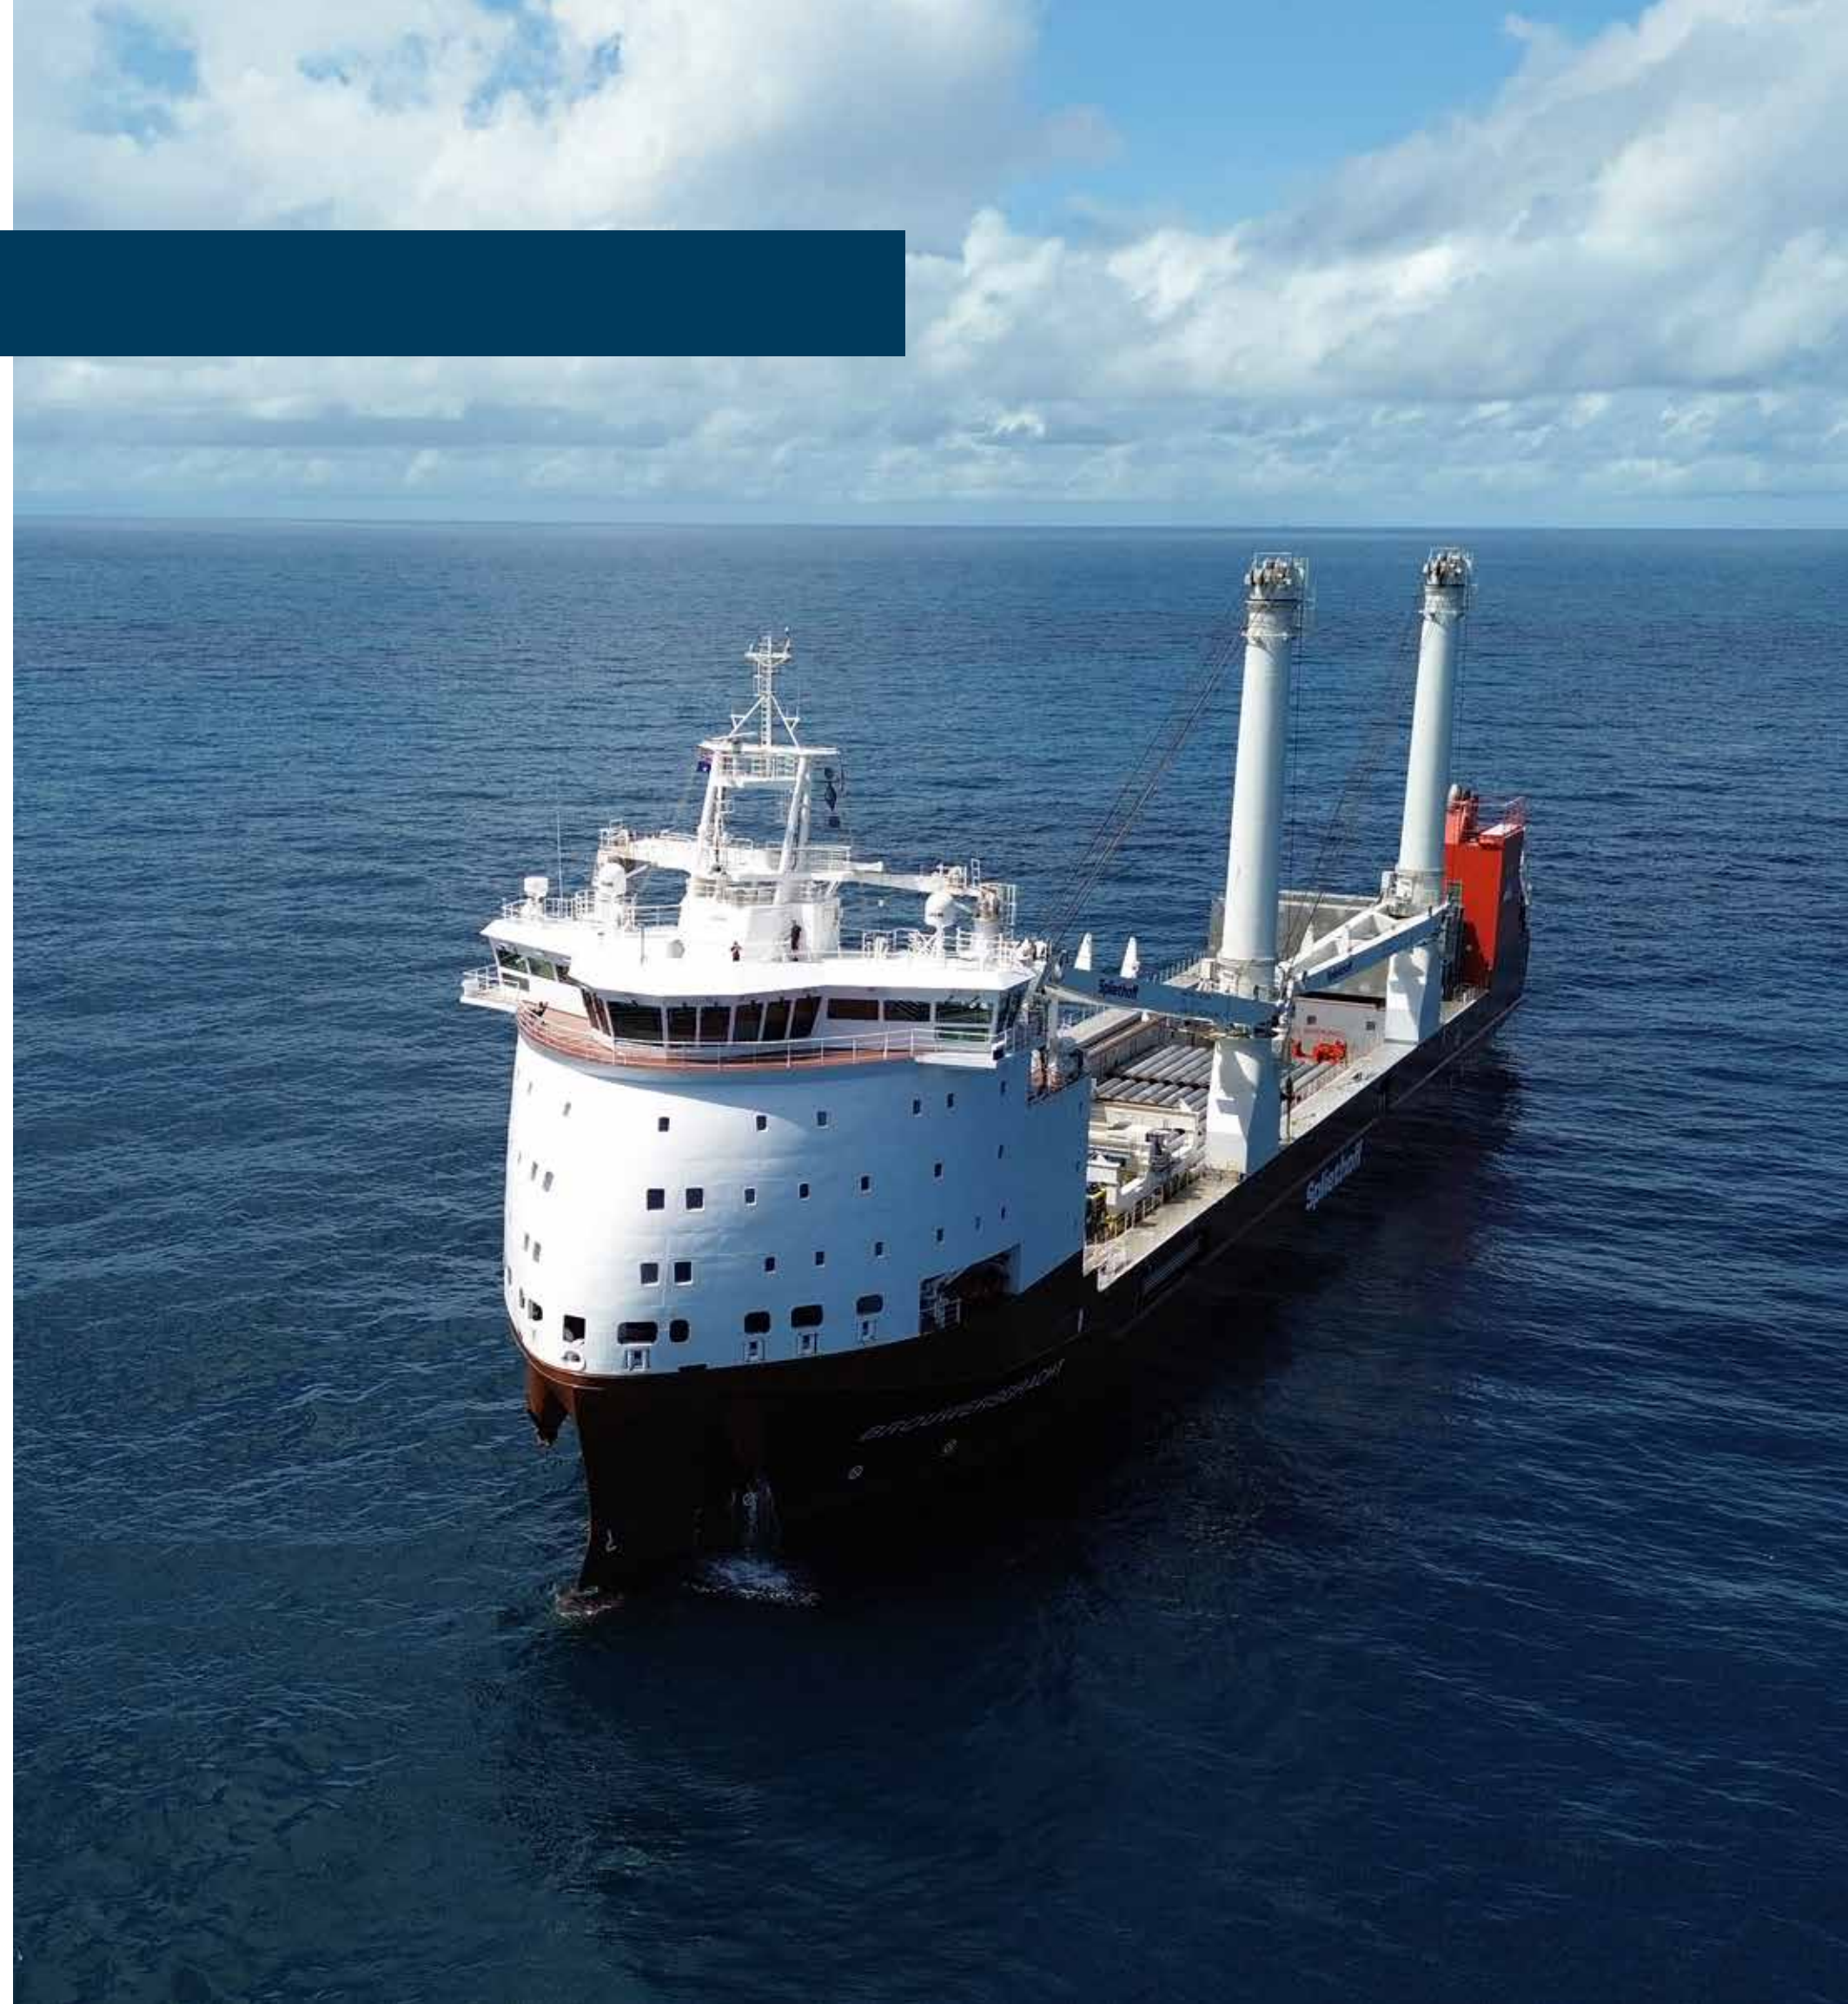

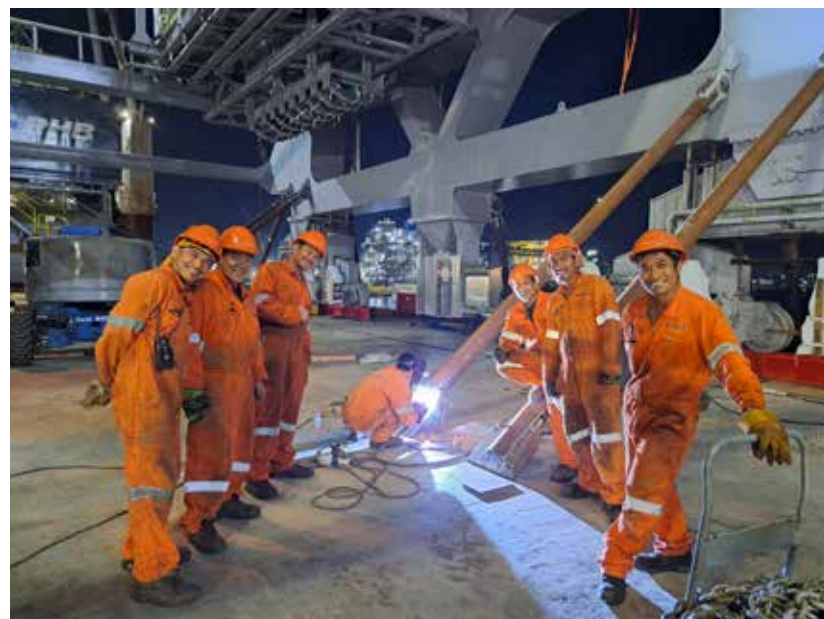

Established in 1921, Spliethoff is the dry cargo and multipurpose specialist. We have built a reputation over the decades, for our high quality standards and for being a reliable, loyal partner.

We have witnessed and been part of many pioneering developments in the industry. This vast experience enables us to offer customers creative solutions to suit their very specific requirements, ensuring their cargo will arrive at its destination swiftly and safely.

We operate a fleet of about 50 modern, ice-classed, multipurpose vessels, ranging from 12,000 to 23,000 tonnes. All vessels are equipped with tween decks and cargo cranes. Additionally, the S-type and newbuild L-type vessels are equipped with side-loaders, enabling rapid and weather independent cargo operations of products such as paper and palletised cargoes.

Our highly trained and motivated personnel in the Spliethoff global network, on board of our ships and in ports all over the world, are committed to maintaining the highest quality standards. As Spliethoff, we aim to be at the forefront of technological developments. This means we are continuously renewing our fleet to make sure it fits the requirements of today and those for the future.

SOLID BETWEEN EVERY SHORE

SEVENSTAR YACHT TRANSPORT

Sevenstar Yacht Transport is the world's leading provider of yacht transportation services.

Ranging from the standardized and the familiar to the one-off and the exotic, Sevenstar Yacht Transport has a wealth of knowledge that it brings to the table, when serving a global network of destinations. Many employees at Sevenstar Yacht Transport have been in the yacht transport business for more than 25 years. But in addition to our experience and expertise, we have passion for what our clients ultimately need for us to do: to ensure each yacht in our care is properly looked after during its transit.

Sevenstar is known for lift-on, lift-off yacht transport and offers specialized divisions:

- Liner Services makes use of nearly 500 liners, most of which provide weekly departures on high-capacity, ocean-faring ships that transit regular routes on fixed schedules calling virtually every port in the world.
- The Racing Yacht Logistics division specifically caters to the logistical needs of racing teams and their equipment, while
- Sevenstar EMT specialises in Exceptional Marine Transport. It has a bespoke professional engineering department to provide individual shipping solutions for exceptional craft such as tugs, dredgers, barges, pontoons and even marina docks.

WE MAKE THE WORLD SMALLER

DYT YACHT TRANSPORT

At DYT Yacht Transport, our mission is to serve the global yachting community with safe, reliable, and on-time yacht transport to the most sought-after destinations in the world.

We are proud to utilize semi-submersible vessels, purpose-built for yacht transport. The “Float on-Float off” method of transporting yachts has been recognised to be the safest in the industry.

Along with our unique fleet of vessels, DYT has fixed sailing schedules with a specific focus on the Mediterranean, Caribbean and East Coast USA, ensuring on-time departures and arrivals for our clients.

The concept started back in 1987 with Dockwise Yacht Transport. Today, DYT holds the unique position of being one of the safest yacht transport providers, transporting hundreds of yachts around the world each year.

SUPER YACHT TRANSPORT

BIGLIFT SHIPPING

BigLift Shipping is one of the world's leading heavy lift shipping companies, specialised in worldwide ocean transportation of ro-ro, heavy lift and project cargoes, with a history dating back to 1973.

At BigLift, we strive for operational excellence and reliability, adhering to the highest Safety, Health, Environment and Quality standards and operating on strict time schedules. Heavy lift transportation is a demanding business. Know-how, expertise and experience are vitally important. We have an excellent Engineering & Operations Department with experts who tackle any challenge, providing innovative and flexible solutions for our customers.

With our over 50 years in the heavy lift sector, we have many long-standing clients who place their trust in us regularly and confidently. A modern fleet of four – six in 2026 – heavy transport vessels and 20 heavy lift vessels - including the Spliethoff P8-Type and P14-Type heavy lift vessels and the Chung Yang CY-Type heavy transport vessels - are utilized for a large array of purposes.

Our team of highly dedicated and skilled professionals, with years of experience and the mindset to always think creatively, enables us to offer innovative and safe solutions for clients with often technically and logistically complex requirements. Careful planning, engineering, coordination and supervision to ensure safe transportation, are all in a day's work.

The heavy lift vessels are all equipped with their own gear, with lifting capacities up to 2,200 mt and some with ro-ro capability for loads up to 2,500 mt. The heavy transport vessels can load ro-ro cargoes up to about 16,000 mt a piece.

KEY IN HEAVY LIFT

BIGLIFT

WIJNNE BARENDS

Wijnne Barends is the Group's shortsea specialist. It was founded in 1855 and counts as one of the oldest shipping companies of the Netherlands.

Based in Delfzijl, in the north of the country, Wijnne Barends is a dynamic and flexible company that offers shipping, logistic services and ship management, including crewing.

At Wijnne Barends Logistics, we operate four terminal locations within the Groningen Seaports and offer stevedoring, warehousing, forwarding and agency services. We operate a fleet of shortsea vessels, including affiliated captain-owned vessels. Wijnne Barends mostly serves Scandinavia, the Baltic States, Western Europe, the White and Black Seas and the Mediterranean.

We have in-house expertise for a broad range of commodities, including sawn timber, peat moss, steel products, fertilisers, grains, wood pulp, biomass products and (recycled) woodchips. The high cubic vessels are well equipped for project cargo and the sea-river vessels regularly operate to Duisburg, Paris, Lake Vänern and many tidal ports along the French and British coasts.

JUST ADD WATER

TRANSFENNICA

Transfennica is a leading, client and environmentally focused shipping company, providing fast and reliable transport with a fleet of highly advanced, ice-strengthened multipurpose Ro-Ro vessels.

Established in 1976, the company offers short lead times with fixed schedules between continental Europe, Estonia, Finland and Russia. Our versatile fleet can practically carry any general cargo such as Sto-Ro, containers, trailers, cassettes, mobile and project cargoes, as well as IMDG-classified goods and temperature-controlled units. The extensive fleet includes in excess of 6,000 roll-trailer units, cassettes and 20', 40' and 45' high-cube, pallet-wide containers.

Short lead times are coupled with fast cargo handling, flexibility and high safety standards, as well as an extensive information technology backup. At Transfennica, our skilled and dedicated employees work in close partnership with customers and suppliers to achieve the high service levels expected, in order to lead in this market.

Within the Spliethoff Group, Transfennica Logistics is one of our fastest growing companies, offering door-to-door container and trailer services suitable for dry and temperature-controlled cargoes. The company provides efficient solutions, which reduce costs by maximising the use of intermodal and contract logistics. Although customers are supported by the entire Spliethoff Group network, Transfennica Logistics also has its own offices and warehouses to optimise service levels.

HIGHWAY OF THE SEA

BORE

Bore has a solid foundation in the shipping industry. Our values reflect our long-standing traditions that go back to 1897.

Today, Bore's mission is to be a corner stone in developing our customers' business, whichever their field or line of trade. To be Your Partner in Shipping - to all our charterers.

Either under Finnish or Dutch flag, Bore currently manages and operates several Ro-Ro and Ro-Flex vessels as well as three LNG powered Ro-Lo vessels. Today we see that Ro-Ro vessels will increase in importance in Shortsea Shipping cargo transportation. This is why all vessels are maintained according to the highest of standards and have either ice class 1A or 1A Super qualifications.

Bore also promotes high safety awareness, with a sharp focus on sustainable shipping with proven competence and customer satisfaction in vessel performance. Our fleet can offer flexible cargo handling and is manned with a motivated and highly competent crew, to ensure an excellent partnership with our customers. Together, we always find and develop the most suitable Shortsea Shipping solution.

At Bore, we emphasize the importance of an eco-friendly approach in innovative transport solutions with fuel efficiency and conscientious shipping. Bore Ltd is certified as an ISO 14001 Environmental Standard compliant company. With the future in mind, Bore is constantly progressing into becoming part of a new generation in sustainable shipping. As an innovative and trusted Ro-Ro Tonnage Provider, Bore offers the most sustainable and economical transport solutions.

YOUR PARTNER IN SHIPPING

FORESTWAVE

ForestWave was founded in 2003. It's the full-service maritime and offshore logistics provider of the Spliethoff Group. We specialise in short sea and worldwide multi-purpose shipping, primarily in European waters and the Atlantic Basin.

We offer a comprehensive range of products and services, with every aspect of our business designed to enhance your success. We are your partner in chartering and ship management, as well as project development, operations services and the sale and purchase of vessels.

In the offshore market, our role extends beyond mere transportation; we enhance the efficiency of our clients' sophisticated offshore installations. We currently operate two dynamic positioning (DP) vessels suitable for offshore services and have plans to expand our capacity in this niche market.

YOUR TRUST MOVES US

ForestWave

SUSTAINABILITY & SAFETY

Minimizing our environmental footprint

As the Spliethoff Group, we are taking our responsibility for reduction of our environmental footprint very seriously. Building a future of sustainable transportation is a big challenge, but one we look forward to meeting in close collaboration with our customers and partners. Within our ISO14001 certified environmental management plan, we focus on reducing the emissions from our vessels regarding to CO₂, NO_x, SO_x, energy efficiency and waste management. But the health and welfare our crews are also crucial aspects of what we see as sustainable transport. Training our crews in sustainability, therefore also has a large focus, as we set out to achieve our goals.

Performance monitoring system

Another important aspect of our efforts towards reducing our environmental footprint is our performance monitoring system. As part of that system we have applied IoT technology to our fleet in order to collect all the data needed to optimize the operational performance and energy efficiency of our fleet. The knowledge gained from this system is then used towards training our crew and office staff, in order to continuously improve our operations. Advanced weather routing tools are also available on board and in our offices ashore, to ensure safe and fuel efficient voyages.

Energy efficient vessel design

In our newbuild program, energy efficient vessel design has high priority and a continuous program of testing and evaluating new technologies to reduce CO₂, NO_x, SO_x and ballast water emissions has been implemented. Over the last years, wind assisted propulsion systems have been tested and are currently used on board. Also, large investments in exhaust gas cleaning systems and ballast water treatment systems have previously been made. Additionally, much research is done on alternative and sustainable fuels and on applying these whenever permitting. The balance of being able to deliver highly efficient operations for our customers and the application of new technologies is very important for us and is our collaboration with our customers, therefore crucial for building the sustainable future we envision.

In our yearly Sustainability Report, you can follow our efforts and endeavors towards a sustainable future. Follow this link to see our latest edition and to subscribe to our mailing list:

Safety is top priority

Safety is paramount within the Spliethoff Group, both for our employees on board and ashore. We have implemented international (ISM Code), national (ARBO) and the latest industry safety standards, so we can guarantee safe operations on board of our vessels. Training is provided to raise safety awareness and to familiarize our co-workers with new techniques and the latest technologies. Extensive programs on risk assessments, incident reporting and investigation have been established.
